

# Infographics – Making Knowledge Visible

**Description:** An infographic is a visual representation of information, data, or knowledge designed to present complex information quickly and to make its meaning clear. Infographics are often used to enhance professional presentations or classroom instruction and student success. This MomentumU@USG course reviews the transformative power of infographics and showcases the steps needed to make knowledge visible and meaningful to your audience.

## Course Goals

Upon completion, you will be able to:

- Recognize how infographics are used to simplify complex data and information.
- Distinguish between the different types of infographics.
- Select and share examples of educational infographics.
- Design an infographic using the elements and principles of design.

## Online Format

This is a self-paced, independent study. You may complete as much of the course as you wish.

## Course topics, activities, and resources include:

- Power of Infographics
- Infographics in History
- Infographics in Education
- How and Why Infographics Work
- Types of Infographics
- Turning Knowledge into Graphics
- Cooking up an Infographic
- Infographic Design – Walk-Through
- Images and Design Elements
- Layout and Design Principles
- Infographic Design Software

## Course Awards

Achievement badges or Community of Practice badges are awarded for completing tasks. A Certificate of Completion is awarded for meeting all expectations.

## Course Author

**Bethany Buck** is currently an Instructional Designer for Fort Valley State University where she also assists in the Center for Teaching and Learning. She is pursuing a Doctor of Education in Leadership with three concentrations (Organizational Leadership, Curriculum Development, and Higher Education Leadership). When she is not cultivating workshops and curriculum, she spends her time as a playwright and thespian in her community theatre.

## Self-Enrollment

USG faculty and staff may self-enroll in the course on MomentumU@USG.
